This is a revision to the spend plan submitted on January 19, 2010 (rev) detailing how GSA will expend the \$5.55 billion authorized by the American Recovery and Reinvestment Act ("Recovery Act"), including measures necessary to convert Federal buildings into high-performance green buildings, renovate and construct Federal buildings and courthouses, and renovate and construct land ports of entry (LPOE).

GSA takes great pride in the progress we have made to obligate Recovery Act funds. We are contributing to our nation's economic recovery through our reinvestments in our public buildings and we are supporting the President's vision for a clean energy future. As part of our due diligence, we reviewed our spend plan progress and determined that revisions are appropriate. For example, we are currently realizing project costs below our original cost estimates. In addition, we have discovered a limited number of challenges as we move forward with projects and have revised the estimates to take into account current conditions.

Based on our cost projections, we are submitting a revised spend plan that adjusts spend plan allocations for existing projects to address unforeseen circumstances and modifies existing projects to include additional high-performance green features.

As with our initial spend plan, we reviewed refinements to projects and project modifications based on two overarching criteria: Ability of the project to put people back to work quickly, and transforming Federal buildings into high-performance green buildings.

A nationally managed, regionally executed Program Management Office is actively monitoring all Recovery Act projects. The office is staffed with experts in various fields to support the regional teams delivering the projects.

High-Performance Green Building (Total): Full & Partial Building Modernizations, Limited Scope (Incl. Energy Projects), and Small Projects	4,274,297	(9,144)	(2)	4,265,151

#### High-Performance Green Building Full and Partial Building Modernization Projects

GSA selected additional projects and project modifications based on two overarching criteria: Ability of the project to put people back to work quickly, and transforming Federal buildings into high-performance green buildings.

The selection criteria used, in descending order of weight:

- High-performance features concentrating on energy conservation and renewable energy generation.
- Speed of construction start (creating jobs), with an emphasis on those projects that could begin within 120 days.
- Execution Risk (ensuring that the projects will not fail due to unforeseen conditions)
